Submit a short word document with:

- A picture of yourself

- Your name

Sade Washington

- Your major

Computer Science

- How much do you know about operating systems?

I know nothing about operating systems. The first chapter in this class displayed a. Basic level of information, but for me it was already quite dense.

- What do you expect to learn (or what would you like to learn) from this class?

Given past conversations. I have had, this is as far into computer engineering

computer science majors get., as it is the intersection of hardware and software. I want to know fully what that means. I want more than a basic level of understanding of operating systems.
